Career summary

Early-career designer with a business and growth-marketing background. I pitched, designed and shipped an in-house WhatsApp campaign tool solo in 2 weeks, and it is now my company's main campaign tool. I understand users and business goals, and I find the problems worth solving and see them through.

Experience

Marketing Executive at Cretile *Oct 2024 – Present*

WhatsApp campaign tool - (pitched, designed and built solo in 2 weeks; AI-assisted development with Claude, hosted on Render)

- Replaced a paid tool that cost ₹1,000 a month. It is now the company's main campaign tool and costs nothing to run.
- Ran 5–10 campaigns to the company's 4,000+ contact list, each with a reply rate of 8% or higher.
- Designed the flow step by step: required tags on contact upload, a step-by-step campaign builder with live preview, and an inbox that shows the 24-hour reply window.
- Built in safeguards against mistakes and Meta blocking the number: opted-out contacts locked in audience filtering, a 10-second undo window, a starting limit of 200 messages a day, sends spread across the day, and automatic stop on Meta warnings.

Projects

Superstash is a creative library for designers *Oct 2024 – Present*

A personal project I'm designing and building as a real product, not just a concept: one place for designers to save the work that inspires them and find it again when they need it.

- Designed and built a responsive web app that works well on mobile, where designers save the things they notice and find them again later.
- Designed the core flows: how people save a reference, how they find it again, and what the AI does for them.
- Set the brand guidelines for the whole product.

Skills

UX: user research (listening to user frustrations, secondary research), user flows, prototyping, interaction design, UX writing, error prevention and edge cases, responsive design

UI: visual design, brand guidelines, layout, consistent visual language

Tools: Figma, Canva, Framer, Claude (prototyping and front-end build)

Collaboration: clear communication, design feedback and review, explaining design to non-designers, data analytics

Education

Bachelor of Business Administration (BBA)
St. Joseph's University, Bangalore · 2024
